Finishing and Mock Exams

Note:

- The Group batch normally contains 2-7 students.
- The teacher and the students can mutually decide about the location of classes (in campus or outside campus).
- BICAF allows flexibility to teacher and the students in deciding about class timings, holidays, extra classes and other specified matters however the decision of the Institute (BICAF) should be considered final in case of conflict.
- All the students are strictly advised to use the question bank and notes as guided (or provided) by the BICAF (or CFA Institute). On completion of the questions given, students may opt to attempt other questions.
- BICAF believes that the students studying once, do not have to repeat the same course in any case. However failed student are given 50% discount with the next batch (but students may better revise at their own and take 5 problem discussion classes for free).
- The students must understand that the teacher is a source of better guidance and quick learning. The classes and the notes provided are not the substitute of student's own study neither of the CFA Curriculum. Indeed you need to work on each and every concept and problem questions after your class and prepare your own notes. We wish you use those notes later when you teach your students.
- For any question, query or issue, email us at cfa@bicaf.org
